**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- In claim 1, line 6: delete "ARP and DHCP", insert "Address Resolution Protocol (ARP) and Dynamic Host Configuration Protocol (DHCP)" after "filtering".

***Allowable Subject Matter***

2. Claims 1-14 are allowed.
3. The following is an examiner's statement of reasons for allowance:
  - Claims are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose an architecture for performing communications between a remote computer system and a host server over a "connection establishment" type network, the architecture comprising: a Point-to-point Protocol (PPP) stack configured on the remote computer system; an Address Resolution Protocol (ARP) service module to provide address resolution configured on the remote computer system; a Dynamic Host Configuration Protocol (DHCP) server to provide DHCP lease renewal configured on the remote computer system; wherein the PPP stack, the ARP service module, and the DHCP server are configured on the remote computer system such that the connection between the remote

computer system and the host server will appear as an "always connected" type connection to the remote computer system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hrasta et al (U.S. Patent No. 6922412) discloses methods for dynamically assigning link addresses and logical network addresses.

Akgun et al. (U.S. Patent No. 6657991) discloses method and system for provisioning network addresses in a data-over-cable system.

Philbrick et al. (U.S. Patent No. 6751665) discloses providing window updates from a computer to a network interface device.
